## Summary

I am an AI/ML Engineer currently working as a Freelance Developer with HSDA, specializing in building intelligent, scalable, and real-world AI solutions. My expertise lies in Machine Learning, Deep Learning, Natural Language Processing (NLP), and Computer Vision, where I design systems that transform raw data into meaningful insights and automation. I have hands-on experience in developing end-to-end AI pipelines — from data preprocessing and model building to deployment and optimization. What I do:

- AI Model Development (ML/DL)
- NLP Systems (Text Analysis, Chatbots, Automation)
- Computer Vision Applications
- AI-based Web Applications

I enjoy solving complex problems and working on innovative projects that create real impact. Currently open to freelance projects, collaborations, and AI-based product development.

---

## Experience

HSDA DIGITAL PVT LTD

AIML Engineer

April 2026 - Present (2 months)

Chhattisgarh, India

Working as a Freelance AI/ML Engineer with HSDA, delivering intelligent and scalable AI-driven solutions across multiple domains.

- Designing and deploying Machine Learning & Deep Learning models for real-world applications
- Building NLP systems for text analysis, automation, and insights generation
- Developing Computer Vision solutions using OpenCV and deep learning frameworks
- Creating end-to-end AI pipelines (data processing → model → deployment)
- Collaborating with clients to translate business problems into AI solutions

Focused on delivering efficient, production-ready systems with measurable impact.

## Benthon Labs

### AI/ML Trainee

October 2025 - Present (8 months)

Noida

Worked as an AI/ML Engineer, developing and deploying scalable Machine Learning and Generative AI solutions for real-world business applications. Built predictive models, recommendation systems, and AI-powered automation tools using Python, TensorFlow, PyTorch, and Scikit-learn. Worked on NLP, Computer Vision, Deep Learning, and Transformer-based architectures for intelligent data-driven solutions.

Handled large-scale datasets including data preprocessing, feature engineering, exploratory analysis, and model optimization. Developed LLM-based applications and AI workflows using LangChain and LangGraph, while integrating cloud-based deployment solutions with AWS, FastAPI, Flask, and Streamlit.

Collaborated with cross-functional teams to integrate AI modules into existing products and improve automation, efficiency, and business decision-making through scalable AI systems.

## IIMT Business Incubator Foundation

### AI Software Developer

May 2025 - August 2025 (4 months)

Meerut, Uttar Pradesh, India

The Medical Analyzer aims to make healthcare more accessible and data-driven by automating the interpretation of lab test results, prescriptions, and diagnostic data. The system uses OCR, NLP, and predictive modeling to provide personalized health insights and risk detection.

### Key Highlights & Achievements

# Built AI/NLP models capable of analyzing medical reports with 92%+ accuracy.

## Integrated OCR-based text extraction and parameter classification modules.

Designed a smart dashboard for real-time visualization of health trends.

Automated the generation of doctor-style summaries to simplify complex results.

Ensured data security and compliance with HIPAA/GDPR standards.

Reduced report interpretation time by over 60%, enabling faster medical decisions.

Collaborated with a cross-functional team of AI engineers and healthcare professionals.

Tech Stack

Python | TensorFlow | Scikit-learn | OpenCV | NLP (spaCy, NLTK) | Flask | React.js | MySQL

Impact: Empowering patients and doctors through AI-driven healthcare insights — making medical data simpler, smarter, and more actionable.

## Education

IIMT UNIVERSITY

Bachelor of Technology - BTech, Artificial Intelligence and machine learning  
· (2022)

G D Global School

Intermediate in PCM · (2020 - 2022)

New Cambridge School

High School Diploma · (2018 - 2020)

G D Global School

High School Diploma, PCM

IIMT UNIVERSITY

Bachelor of Engineering, Computer Engineering
